**EASY TO
SPREAD
GRANULES**

**REVITALIZES
SOIL BY IMPROVING
AIR & WATER FLOW**

FEEDING YOUR SOIL

If you've struggled to grow a great lawn in the past, poor soil that is hard and compacted is often the problem. LOVE YOUR SOIL assists in breaking up clay and compacted soils, which improves root penetration, promotes growth and root mass while helping release trapped nutrients in the soil.

DIRECTIONS FOR USE

ESTABLISHED LAWN:

LOVE YOUR SOIL can be applied anytime of the year.

Apply one bag of LOVE YOUR SOIL per 15,000 sq. ft. using the "Spreader Settings" chart below. For best results, aerate or rake the lawn vigorously prior to applying LOVE YOUR SOIL. Watering is not necessary, but if possible, water in after application for 15-30 minutes. For very hard soil, repeat applications twice a year may be necessary.

NEW LAWN OR OVERSEEDING LAWN OR SODDING:

When seeding or sodding lawns, for best results, LOVE YOUR SOIL should be applied with Jonathan Green Veri-Green Lawn Food for Seeding & Sodding. These products can be applied in any order, on the same day, before or after applying grass seed.

Apply one bag of LOVE YOUR SOIL per 7,500 square feet using the "Spreader Settings" chart below. For best results, aerate or rake the lawn vigorously prior to applying LOVE YOUR SOIL, grass seed or any of the Jonathan Green products mentioned above. Watering is not necessary, but if possible, water in after application for 15-30 minutes.

SPREADER SETTINGS

The following settings are approximate. An accurate calculation can be made by application to 1,000 sq. ft. and adjusting spreader opening to apply 3.1 lbs. per 1,000 sq. ft. Settings are based on an average walking speed. Reduce setting for slower speed; raise setting for higher speed. Check your spreader on 250 square feet and adjust to apply at the rate of .78 pounds per 250 square feet. Sweep (do not wash) all fertilizer materials from surfaces immediately after application, because certain fertilizer ingredients can cause permanent stains. Wash out spreader after each use and allow it to dry thoroughly. Treat any exposed metal spreader areas with oil to reduce corrosion.

4	twice
4	over the
	area at
	the same
	setting to
	the left

USAGE TIPS

For rectangular lawns

Apply two header strips across each end for a turning area. Then apply back and forth in the longest direction.

For irregular-shaped lawns

Apply a header strip around the entire lawn for a turning area, then apply back and forth.

Note: Each pass should be within 8 feet of each other to ensure an overlap.

- Do not leave spreader open when making turns.
- For best results, do not apply on a windy day.
- Swath will vary due to weather conditions, product used and walking speed.
- To determine how much coverage you need, multiply the length of your lawn by its width. This equals your total square footage. Deduct any non-lawn areas (house, gardens, walkways, etc.). One bag covers up to 15,000 sq. ft.

GUARANTEED ANALYSIS

Calcium (Ca)	21.0%
Sulfur (S)	3.8%
3.8% Combined Sulfur (S)	
Iron (Fe)	1.0%
0.01% Water Soluble Iron (Fe)	
Derived from: Calcium Sulfate Dihydrate, Calcium Carbonate, Iron Humate and Molasses.

CAUTION

Store in a cool dry place out of the reach of children and pets. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn or garden and sweep any product that lands on the driveway, sidewalk or street back onto your lawn or garden. Also, sweep fertilizer off concrete surfaces to avoid staining.

NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling if such use is contrary to label instructions.
